

## Motor City Wash Works Inc

### Air One Dryer

#### WHERE

Air One Dryers work best at the end of the wash tunnel with adequate drip space between the final rinse arch and the first dryer air producer.

#### WHY

Air One Dryers produce the "dry" part of "Clean, Shiny, Dry" cars. 10HP premium efficiency motors and a harmonically balanced air producer help make this the best value of dryers on the market.

#### AIR ONE™ DRYER - Color Skinz Arch™

The Air One™ Dryer is named appropriately for its tremendous air production. HP Air One Dryers deliver similar air flow output performance ratings as other dryers using 15 HP motors. Standard 10 HP air producers utilize a welded steel, 12 blade impeller that operates at a surprisingly pleasant, ear friendly pitch. Air One Dryers are very versatile and energy efficient. Each 10 HP motor is rated as "Premium Efficiency" at 92% efficiency. With our flexible mounting system, each air producer can be positioned for the optimum attack angle. Air One Dryers are simple yet flexible. The Air One™ Color Skinz™ Arch can mount up to 5 producers on a single arch. Following the branding capability offered with Color Skinz™, Air One™ producers are offered in multiple colors, Red, Black, Blue and Yellow.

#### FEATURES

- Color Skinz™ snap-on structure wrap.
- 10 HP electric motors 208/230/460V.
- **Premium Efficiency, UL approved, Marathon® Blue Chip™ motors.**
- Molded Plastic Dryer Housing is available in multiple colors - Yellow, Black, Blue, Red.
- Surprisingly quiet, harmonically balanced air producers.
- Flexible motor mounting adjustment plates allow for multiple angles of attack to dry the vehicles' surface.
- Compact Design packs drying power into a small footprint and saves space.

Flexible mounting options allow the motors and nozzles to be set at optimum attack angles.

### ORDERING INFORMATION - Air One™ Dryer Systems With Color Skinz™ Arch

### AIR ONE™ DRYER - Aluminum Arch

This is the same great Dryer as the Color Skinz Dryer, yet it is more cost effective, and it's height is adjustable so it can more easily fit into existing bays with space constraints. This Dryer is the perfect add-on dryer for In-Bay Automatic bays.

### FEATURES

- Aluminum Arch Structure features 4X6 inch beams, adjustable height crossbeam.
- 10 HP electric motors 208/230/460V.
- **92% Premium Efficiency, UL approved, Marathon® Blue Chip™ motors.**
- Molded Plastic Dryer Housing is available in multiple colors - Yellow, Black, Blue, Red.
- Surprisingly quiet, harmonically balanced air producers.
- Flexible motor mounting adjustment plates allow for multiple angles of attack to dry the vehicles' surface.
- Compact Design packs drying power into a small footprint and saves space.
